

## IP Acquirer Communications.

QNET Financial™ (or “QFi”) is a smarter way for merchants to connect to their financial acquirers and host providers for processing EFTPOS and other types of transactions. Accessed through a secure DSL connection, QNET Financial™ provides a fast, reliable and cost effective transaction processing solution suitable for single stores or Enterprise-wide retail networks.

“ QFi enables connection to multiple acquirers with ease ”

*Fast TCP/IP Connectivity* . . . .

*Business Grade Service* . . . .

*Secure Private network* . . . .

*Fully Auditable* . . . .

*Multi-host Support* . . . .

Single Store QFi Connection with PSTN Dialup Failover

**MULTI-HOST SUPPORT** QFi supports multiple concurrent transaction hosts, all accessible through a single communications service, ideal for dual or multi-acquirer EFTPOS implementations.

**SPEED** TCP/IP connectivity provides greatly improved transaction throughput compared with legacy ISDN and leased line networks.

**SECURITY** Utilises a private IP connection into the core network ensuring transaction security

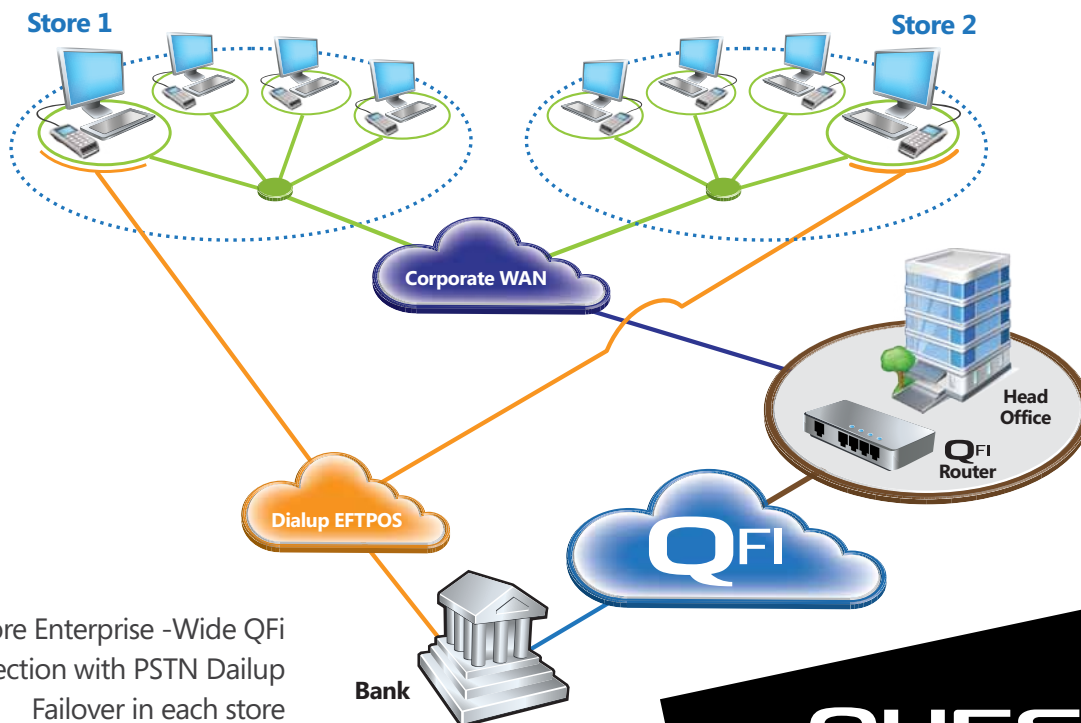

**INEXPENSIVE** Simple cost structure consisting of an Installation Fee, Monthly Access Fee, and low data usage fee per financial transaction.

**AUDITABLE** Data usage charges are fully auditable as only financial transactions are charged. Non-financial messages such as Logons, Settlements, Parameter Table Downloads, and Key Initialisations are free.

**INSTALLATION & SUPPORT**

QFi services are professionally installed onsite by qualified technicians, and Help Desk support is provided 7 days a week.

Contact Quest for further information on how QFi can help your business.

Multi Store Enterprise -Wide QFi Connection with PSTN Dialup Failover in each store

**Additional Services**

Quest also provides additional services including server hosting, server management, network design, and complete retail 'Wide Area Network' solutions.
