

CT400 CONTACTLESS TERMINAL

Going cashless starts with a tap

The CT400 Contactless Payment Terminal changes the way traditional coin operated machines accept payments. Seamless integration allows your customers to pay securely through contactless and mobile payment methods.

Designed for both indoor and outdoor use, the simple, durable design makes it a breeze to add contactless payments to your self-service operations.

No spare change? No problem!

VENDING

CHARITY

This sleek contactless card reader can be retrofitted onto almost any machine and gives your consumer a convenient cashless payment experience. Our Cloud-based web portal enables you to configure a pre-set transaction amount to be displayed on the reader's full colour display. Real time reporting through the web portal means you can constantly monitor sales performance and uptime.

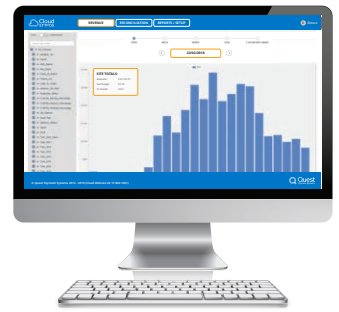

SUPPORTED PAYMENTS

HOW CT400 WORKS

Manage your water and dustproof contactless reader by configuring a pre-set transaction amount using the Cloud EFTPOS web portal.

Once set, your reader will display the amount on its full colour display, ready to take payment using Visa, Mastercard, eftpos, and Amex* contactless enabled cards, mobiles and wearables. Upon success of the transaction, site equipment is activated, with funds settled daily to your nominated bank account.

FEATURES AND BENEFITS

- 
CONVENIENT
 Give your customers what they want - a fast, contact-free payment experience
- 
CASHLESS AND SECURE
 Eliminates the costs normally associated with management and security of cash collection
- 
HIGHLY RELIABLE
 Fully enclosed IP66 water and dustproof design can be installed anywhere on site, inside or outside
- 
INDEPENDENT CONNECTION
 Inbuilt 3G connectivity removes reliance on separate communications modules or local networks
- 
SMALL FOOTPRINT
 One-piece design makes it easy to retrofit onto existing site equipment
- 
CONTACTLESS ONLY
 Take advantage of Australia's fastest growing form of payment including new schemes and technologies such as eftpos Contactless, Apple Pay, Samsung Pay and Google Pay
- 
FLEXIBLE INTEGRATION
 CT400 works off a simple pulse - your new generation coin mechanism
- 
CLOUD BASED CONFIGURATION
 Cloud EFTPOS web portal provides setup and configuration of devices as well as software updates
- 
REPORTING DASHBOARD
 Customisable transaction reporting providing single view insights across your devices, with real time revenue tracking, payment and cash flow trends and access to enhanced reconciliation reports. Access online via browser or using the Cloud EFTPOS Dashboard app downloaded from your preferred App Store
- 
DAILY SETTLEMENT
 Funds are deposited into your nominated bank account daily
- 
COMPETITIVE FEES
 Competitive merchant fees keep your customers coming back
- 
INNOVATION
 Work with Quest to implement innovative add-ons such as loyalty and alternative payment types
